B. Questions, Additions, and Deletions

1- The interpretation of that comment "The contractor will complete the exhibit drive north traffic lanes (passed material Testing) before construction is started on the Exhibit Drive South Traffic Lanes". Are we to interpret that this project will be done in two phases and that we are to keep one side of the lane open while we work on the other. If that is the case it will add an extra 30 days to perform all the necessary steps again.

**Response:**

**1.a. The sequencing is not to add an additional 30 days to the schedule.**

**1.b. The sequencing is to have one lane with new concrete curing while the other lane starts demolition and installation.**

2- It was mentioned in the project sequence that construction on the exhibit drive south lanes will start after materials test has been passed for the north traffic lanes , please advise if we can start the two lanes in the same time , in order to complete the project during the time frame .

**Response: South lanes cannot begin demolition until the North lanes have passed materials testing.**

3- As per the revised MOT plan, please confirm whether the MOT barricades will remain during the non-activity period for the full entire duration, or it has to be setup daily.

**Response: MOT barricades are to remain for the entire duration.**
