

Y15-101-SS

Orange County, Florida is interested in participating in a **Lease Program for Gas Detection Equipment**, including internet support for record keeping and maintenance, on an annual basis. To date, research within the industry has indicated to the County that the iNet program provided by Industrial Scientific Corporation is the only program that fulfills this requirement. Any vendor that wishes to view the documentation to determine if they can meet the County's requirements is invited to contact Maria Alvarez by phone at (407) 836-5636 or by email at maria.alvarez@ocfl.net. This information will be available for review until 5 PM November 25, 2014.
