<u>Selection Criteria Weight per Phase</u>		
Phase 1 (Written Proposal)	45	
Phase 2 (Demonstration/Presentation)	20	
Phase 3 (Fee Proposal, Location & M/WBE)	35	
<b>TOTAL</b>	<b>100</b>	

Welfare Transition and Dislocated Workers Hires	5 Bonus Points
Registered SDV SubContractor Hires	10 Bonus Points

**Cost will only be evaluated for proposals that received satisfactory scores on the previous phases.** The County reserves the right to request additional information to facilitate the selection.

### 2. PHASE 1, WRITTEN PROPOSAL – EVALUATION DETAIL

Proposals will be evaluated in this Phase based on the written proposal. The evaluation score for Phase 1 will be calculated based on the weighted criteria in the table below. Only those proposers whose responses are scored 135 or above and meets the all of the County’s prerequisite requirements shall be qualified for Phase 2.

#### Prerequisite Requirements

Proposers who fail to comply with the prerequisite submittals shall be deemed non-responsive and will be eliminated from further consideration.

#### Written Response

The written response portion for the Phase I evaluation, will be calculated based on the following weighted criteria.

SECTION	SELECTION CRITERIA	WEIGHT
1.2	Proposer Qualifications & References	15
1.3	Technical Approach	5
1.4	Functional Approach	25
	<b>TOTAL</b>	<b>45</b>

The formula for calculating an evaluation score is as follows: Each question or requirement will be evaluated using a score of 1 to 5 with 1 being the lowest score and 5 being the highest score. The average weight for all items listed under the selection criteria will be multiplied by the applicable selection criteria weight.

EXAMPLE: If Section 1.3 contains 3 questions, scored 1, 3 and 5 respectively resulting in an average score of 3. The average score of 3 will then be multiplied by the assigned weight of 5 for section 1.3 resulting in a weighted score of 15 (3 X 5).

**3. PHASE 2, PRESENTATION / DEMONSTRATION – EVALUATION DETAIL**

The specific place and time for the Phase 2 on-site presentation/demonstration will be determined after the preliminary evaluation of the proposals has been completed. Qualified proposers will be notified of their scheduled presentation with specific instructions for Phase 2.

At the onsite proposal presentations/demonstration, proposers will make an oral presentation and provide a demonstration of their proposed solution. The presentation shall provide proposers with an opportunity to explain the functional and technical capabilities of their product. Only those proposers whose responses for Phases 1 & 2 cumulatively score 195 or above and meets all of the County’s requirements as outlined in the RFP shall be selected to continue to Phase 3 of the evaluation process.

Evaluation of the Phase 2 response will be based on the proposer’s on-site presentation, demonstration and interview. The evaluation score for Phase 2 will be calculated based on the weighted criteria in the table below.

<b><u>SECTION</u></b>	<b><u>SELECTION CRITERIA</u></b>	<b><u>WEIGHT</u></b>
2.1	Project Presentation	5
2.2	System Demonstration Tasks	10
2.3	Project Team Interview	5
	<b>TOTAL</b>	<b>20</b>

The onsite presentation portion for the Phase 2 will be evaluated similar to Section 1 using a score of 1 to 5 with 1 being the lowest score and 5 being the highest score. The average weight for all items listed under the selection criteria will be multiplied by the applicable selection criteria weight.

EXAMPLE: If Section 2.2 contains 4 requirements, scored 1, 3, 3 and 5 respectively resulting in an average score of 3. The average score of 3 will then be multiplied by the assigned weight of 10 for section 2.2 resulting in a weighted score of 30 (3 X 10).

If a Proposer fails to attend a confirmed on-site demonstration without prior authorization of the County, the Proposer may be determined to be ineligible for further consideration.

**Fact Finding**

Immediately following the Proposer’s presentation the Proposer will have the opportunity for Fact Finding. No portion of fact finding is included in the scored evaluation.

- 2) Detail text-to-speech options and capabilities for sending voice alerts to fire stations and units in the field.
- 3) Detail the system's capability to allow staff the ability to quickly correct phonetic mispronunciations. Outline the process.
- 4) Detail the proposed solutions options and capabilities for sending a pre-announcement to a fire station that alerts personnel of the pending unit assignment and call type.
- 5) Describe the proposed solution's automated voice feature. Detail how the solution converts incident details in the CAD system from text to speech, then, relays the voice communication to speakers inside the fire station.
- 6) Detail the proposed solutions options and capabilities for simultaneously delivering pre-alerts to smart phones or tablets using the Android operating system.
- 7) Detail the proposed solutions options and capabilities for simultaneously delivering pre-alerts to smart phones or tablets using other operating systems such as Apple, Windows, etc...

### 3.2 M/WBE PARTICIPATION

- A. Proposers must address how they intend to comply with the Orange County M/WBE Ordinance, No. 94-02 and amended by Ordinance No. 2009-21. The goal of 24% utilization of certified minority/women business enterprise is applicable to this project. The Ordinance also addresses minority/women group employment levels setting goals to encourage each Proposer to maintain 24% minority and women employee workforce levels in specific categories.
- B. All participating M/WBE firms must be **currently certified by Orange County**. The Business Development Division's most recent M/WBE directory is available by e-mail or through the Orange County web site at OrangeCountyfl.net. Only firms having established offices in the Orlando MSA (Orange, Lake, Seminole and Osceola Counties) are eligible for Orange County certification.

All firms must be Orange County certified at time of submittal of the Proposal and must be certified in the area(s) for which they will be used. If a firm claims to be certified, but is not listed in the Directory the Proposer should obtain a copy of their Orange County Certificate and/or contact the Business Development Division at (407) 836-7317 for verification of certification.

- C. Effective August 1, 2003, the County has implemented a graduation program whereby M/WBE firms designated as graduates can participate in the M/WBE program only on specified projects. A prime consultant may only use a graduate M/WBE to satisfy M/WBE participation in the following:
- For Professional Services in which estimated the overall contractual fees to be awarded to the prime in excess of \$500,000.
  - Vertical construction projects in which the total prime contractor's estimate in excess of \$10,000,000.
  - Horizontal construction projects in which the total prime contractor's estimate in excess of \$7,000,000.
  - Other construction projects in which the total estimate is in excess \$7,000,000.

**It is the proposing firm's responsibility to insure that graduate M/WBE's are not listed in proposals to meet M/WBE participation requirements on projects in which they are not eligible to participate.**

- D. The County has established a credit program whereby Proposers are awarded credits to be applied toward meeting the M/WBE goals on certain County projects. Emphasis will be placed on credits for non-County utilization and first-time M/WBE utilization. Proposers are encouraged to contact the Business Development Division for information on acquiring and applying the credits.

- E. Proposers must submit signed Letter of Intent with their Proposal for all current Orange County certified M/WBE subcontractors identified on the **SCHEDULE OF SUBCONTRACTING – M/WBE PARTICIPATION FORM**. These Letters of Intent must indicate the scope of work to be performed by every M/WBE plus the percentage of the contract fees to be contracted to the listed subcontractor.
- F. The awarded prime Contractor's responsibilities and requirements are itemized below:
1. Incorporate a 72-hour prompt payment assurance provision and payment schedule in all contracts between the prime and sub-Contractors.
  2. File copies of all executed subcontractor agreement/contracts between the prime and all M/WBE subcontractors on the project to Orange County Business Development Division.
  3. The awarded prime Contractor shall furnish written documentation evidencing actual dollars paid to each subcontractor utilized by the prime Contractor on the project. This will include, but not limited to: copies of cancelled checks, approved invoices, and signed affidavits certifying the accuracy of payments so that the County may determine actual participation achieved by the prime Contractor prior to the issuance of final payment.
  4. The prime Contractor shall submit an updated quarterly MWBE utilization report and the "Employment Data, Schedule of Minorities and Women" report for all professional service contracts. The required reports are to be submitted to the Business Development Division no later than the fifth day after end of reporting period.
  5. The awarded prime Contractor shall not substitute, replace or terminate any M/WBE firm without prior written authorization of the County, nor shall the prime reduce the scope of work or monetary value of a subcontractor without written authorization of the County. The prime Contractor shall notify the Business Development Division of any additional awards to the M/WBE firm on the prime Contractor's team and the addition of any new M/WBE firm to the prime Contractor's team on that project.
  6. The prime Contractor shall expeditiously advise all M/WBE's and the Business Development Division of all change orders, contract modifications, additions and deletions to any and all contracts issued to the M/WBE firm on their team.

**Execution of the contract between Orange County and the Proposer shall be contingent upon the filing of executed contracts between the Proposer and the M/WBE subs listed on the SCHEDULE OF SUBCONTRACTING – M/WBE PARTICIPATION FORM with the Business Development Division.**

Proposers are expressly prohibited from substituting subcontractors projected to perform five percent (5%) or more of the overall work as stated in the written Proposal.

Such substitution, for any reason, after opening of the Proposal, and prior to award by the County, shall result in disqualification of the Proposal from further consideration for award, except in extraordinary circumstances. Examples of such circumstances are the subcontractors' firm going out of business; death of the owner of the firm; or the inability of the sub-Contractor to perform the work specified. Should such an occurrence arise, it must be substantiated, and the sub- substitution approved, by the County prior to contact execution.

## **SCOPE OF SERVICES**

### **1. OVERVIEW**

The Consultant shall provide each fire station with an alerting system that notifies all on-duty personnel of emergency incident dispatch information in a manner that promotes the fastest turnout times with reduced firefighter stress in accordance with the County's requirements as specified herein.

The layout for each facility is very different, and each will have different requirements with regard to audio, lighting, wiring and functionality needs.

### **2. ORANGE COUNTY PROFILE**

Orange County exercises the rights and privileges conveyed to it by the State of Florida, and the Orange County Charter. It presently operates with an elected chief executive officer, Orange County Mayor, and six elected district commissioners, who together comprise the Board of County Commissioners. The Board sets utility policies, fees, and rates, and approves the budget. The Orange County Mayor is responsible for overseeing the administration of the day-to-day operations of Orange County Government.

### **3. BACKGROUND**

The Orange County Fire Rescue Department has 41 fire stations, station floor plans are provided in Exhibit 3. Each location is staffed 24/7. Each fire station currently receives alert dispatch notification via an IP network. The IP network receives messages from the Tiburon Command CAD System, Version 2.9. Command signals sent to the fire station by dispatch will activate relays/timers, which, in turn, activate/deactivate devices, i.e., station lighting, audio, strobes, chimes, stoves, and apparatus bay exhaust.

A redundant notification system is currently in use for instances of a loss of IP network connectivity. In these instances, tones are sent from the dispatch center via a Zetron alert box (Model 25 Encoder). The Zetron alert box activates the station alerting system of a single or group of fire stations, through a Motorola UHF radio. The tones generate a Motorola "Quick Call 2 Format" with standard base tone remote keying tones (2175 Hz and 1950 Hz). The Motorola Quick Call 2 tones are sent to a Midian Model TRC-1000 Tone Remote Control console, which supplies the base station keying tones via a TeNSr Channel Bank using 4-wire cards.

The proposed solution shall provide a back-up solution via the UHF radio to replace the existing Zetron and Midian control boxes.

#### 4. **SYSTEM REQUIREMENTS SPECIFICATION**

##### A. Orange County Operational Functions

1. The Consultant shall provide an alerting system that functions in a similar manner to the current system described above. The system shall be based on the operational profile of the current system, but with new hardware, updated facility wiring, additional notification and feedback capabilities and integration with the existing CAD system
2. The system shall have the capability to integrate with the Tiburon Command CAD System, Version 2.9. The minimum required data fields for the existing Tiburon Command CAD System are:
  - Call type
  - Call type text description
  - Location (includes city code)
  - Commonplace address (if location has a commonplace name)
  - Location comments
  - Cross streets
  - Dispatch group
  - Geographical area
  - Map page
  - Comments entered at call entry
  - List of all units included in the dispatch
3. The system shall be capable of automatically notifying units in the field as well as in fire station quarters. Units are equipped with portable and mobile radios, a personal computer/Mobile Data Computer, which is running the Tiburon MobileCOM Version 5.2 application with wireless connectivity and smart phones operating on the Android operating system.
4. The system shall be capable of adding other stations or jurisdictions, assuming purchase of their own station hardware and connectivity to the specified fire dispatch center.
5. The system shall allow for multiple specific and distinctive pre-alert tones to be assigned to specific types of responses and stations in addition to the dispatcher's voice.

6. The system shall have the ability to integrate with the speakers and telephone systems already installed in the fire stations. The system shall maintain the ability to provide sufficient audio levels to be heard clearly throughout the station and yard area. When a visitor activates a doorbell, an announcement shall be heard throughout the station. The system shall announce and display at which door the visitor is located in the event of multiple doorbells.

24. All equipment shall be installed in specified rooms in such a manner that it does not inhibit any normal functions. All cabling shall be installed in compliance with *NFPA 70, National Electrical Code*, and all applicable local codes, amendments and ordinances.
25. The Proposer shall provide electrical and wiring upgrades at no additional cost as required to meet all criteria.
26. The system shall meet specifications required to support high availability alerting, when using backup power. Backup power (UPS) shall be available for all system fire station equipment. The switchover to backup power shall be instantaneous, automatic and without loss of data or communications.
27. Upon receiving a specific notification from dispatch, stations shall be wired so that apparatus bay lights and exhaust fans automatically come on and remain on for two minutes, unless a manual reset button is activated.

28. The system shall allow for authorized personnel to make changes onsite at stations to modify system timers.
29. The system shall provide the ability to monitor and administer the system remotely.
30. The system shall provide a System Test Switch, which allows personnel to conduct a full-station test of the alerting system.
31. The Proposer shall provide a Data Line Surge Protector that protects the alerting system from data line surges.
32. The system shall provide a Radio isolation unit that offers protection to the station alerting equipment from lightning strikes or other unforeseen electrical problems.
33. The system shall provide remote diagnostic capabilities.
34. Maintenance of the system shall not impact the overall operation and reliability of the system.
35. The system shall be of modular design so that additional devices can be controlled at a facility, i.e., additional bay doors, additional companies that may be added to the configuration.
36. The system shall be capable of expanding.

**ABOUT THE**  
**RELATIONSHIP DISCLOSURE FORM**

*Updated 6-28-11*

**WHAT IS THE RELATIONSHIP DISCLOSURE FORM?**

The Relationship Disclosure Form (form OC CE 2D and form OC CE 2P) is a form created pursuant to the County's Local Code of Ethics, codified at Article XIII of Chapter 2 of the Orange County Code, to ensure that all development-related items and procurement items presented to or filed with the County include information as to the relationship, if any, between the applicant and the County Mayor or any member of the Board of County Commissioners (BCC). The form will be a part of the backup information for the applicant's item.

**WHY ARE THERE TWO RELATIONSHIP DISCLOSURE FORMS?**

Form OC CE 2D is used only for development-related items, and form OC CE 2P is used only for procurement-related items. The applicant needs to complete and file the form that is applicable to his/her case.

**WHO NEEDS TO FILE THE RELATIONSHIP DISCLOSURE FORM?**

Form OC CE 2D should be completed and filed by the owner of record, contract purchaser, or authorized agent. Form OC CE 2P should be completed and filed by the bidder, offeror, quoter, or respondent, and, if applicable, their authorized agent. In all cases, the person completing the form must sign the form and warrant that the information provided on the form is true and correct.

**WHAT INFORMATION NEEDS TO BE DISCLOSED ON THE RELATIONSHIP DISCLOSURE FORM?**

The relationship disclosure form needs to disclose pertinent background information about the applicant and the relationship, if any, between, on the one hand, the applicant and, if applicable, any person involved with the item, and on the other hand, the Mayor or any member of the BCC.

In particular, the applicant needs to disclose whether any of the following relationships exist: (1) the applicant is a business associate of the Mayor or any member of the BCC; (2) any person involved with the approval of the item has a beneficial interest in the outcome of the matter *and* is a business associate of the Mayor or any member of the BCC; (3) the applicant is a relative of the Mayor or any member of the BCC; or (4) the Mayor or any member of the BCC is an employee of the applicant. (See Section 2-454, Orange County Code.)

**HOW ARE THE KEY RELEVANT TERMS DEFINED?**

Applicant means, for purposes of a development-related project, the owner, and, if applicable, the contract purchaser or owner's authorized agent. Applicant means, for purposes of a procurement item, the bidder, offeror, quoter, respondent, and, if applicable, the authorized agent of the bidder, offeror, quoter, or respondent.

Business associate means any person or entity engaged in or carrying on a business enterprise with a public officer, public employee, or candidate as a partner, joint venture, corporate shareholder where the shares of such corporation are not listed on any

national or regional stock exchange, or co-owner of property. In addition, the term includes any person or entity engaged in or carrying on a business enterprise, or otherwise engaging in common investment, with a public officer, public employee, or candidate as a partner, member, shareholder, owner, co-owner, joint venture partner, or other investor, whether directly or indirectly, whether through a Business Entity or through interlocking Parent Entities, Subsidiary Entities, or other business or investment scheme, structure, or venture of any nature. (See Section 112.312(4), Florida Statutes, and Section 2-452(b), Orange County Code.)

*Employee* means any person who receives remuneration from an employer for the performance of any work or service while engaged in any employment under any appointment or contract for hire or apprenticeship, express or implied, oral or written, whether lawfully or unlawfully employed, and includes, but is not limited to, aliens and minors. *Relative* means an individual who is related to a public officer or employee as father, mother, son, daughter, brother, sister, uncle, aunt, first cousin, nephew, niece, husband, wife, father-in-law, mother-in-law, son-in-law, daughter-in-law, brother-in-law, sister-in-law, stepfather, stepmother, stepson, stepdaughter, stepbrother, stepsister, half brother, half sister, grandparent, great grandparent, grandchild, great grandchild, step grandparent, step great grandparent, step grandchild, step great grandchild, person who is engaged to be married to the public officer or employee or who otherwise holds himself or herself out as or is generally known as the person whom the public officer or employee intends to marry or with whom the public officer or employee intends to form a household, or any other natural person having the same legal residence as the public officer or employee. (See Section 112.312(21), Florida Statutes.)

**DOES THE RELATIONSHIP DISCLOSURE FORM NEED TO BE UPDATED IF INFORMATION CHANGES?**

Yes. It remains a continuing obligation of the applicant to update this form whenever any of the information provided on the initial form changes.

**WHERE DO THE RELATIONSHIP DISCLOSURE FORM AND ANY SUBSEQUENT UPDATES NEED TO BE FILED?**

For a development-related item, the Relationship Disclosure Form and any update need to be filed with the County Department or County Division where the applicant filed the application. For a procurement item, the Relationship Disclosure Form and any update need to be filed with the Procurement Division.

**WHEN DO THE RELATIONSHIP DISCLOSURE FORM AND ANY UPDATES NEED TO BE FILED?**

In most cases, the initial form needs to be filed when the applicant files the initial development-related project application or initial procurement-related forms. However, with respect to a procurement item, a response to a bid will not be deemed unresponsive if this form is not included in the initial packet submitted to the Procurement Division.

If changes are made after the initial filing, the final, cumulative Relationship Disclosure Form needs to be filed with the appropriate County Department or County Division

processing the application not less than seven (7) days prior to the scheduled BCC agenda date so that it may be incorporated into the BCC agenda packet. When the matter is a discussion agenda item or is the subject of a public hearing, and an update has not been made at least 7 days prior to BCC meeting date or is not included in the BCC agenda packet, the applicant is obligated to verbally present such update to the BCC when the agenda item is heard or the public hearing is held. When the matter is a consent agenda item and an update has not been made at least 7 days prior to the BCC meeting or the update is not included in the BCC agenda packet, the item will be pulled from the consent agenda to be considered at a future meeting.

**WHO WILL REVIEW THE INFORMATION DISCLOSED ON THE RELATIONSHIP DISCLOSURE FORM AND ANY UPDATES?**

The information disclosed on this form and any updates will be a public record as defined by Chapter 119, Florida Statutes, and may therefore be inspected by any interested person. Also, the information will be made available to the Mayor and the BCC members. This form and any updates will accompany the information for the applicant's project or item.

However, for development-related items, if an applicant discloses the existence of one or more of the relationships described above and the matter would normally receive final consideration by the Concurrency Review Committee or the Development Review Committee, the matter will be directed to the BCC for final consideration and action following committee review.

ABOUT THE  
SPECIFIC PROJECT EXPENDITURE REPORT**  
*Updated 3-1-11*

**WHAT IS A SPECIFIC PROJECT EXPENDITURE REPORT (SPR)?**

A Specific Project Expenditure Report (SPR) is a report required under Section 2-354(b) of the Orange County Lobbying Ordinance, codified at Article X of Chapter 2 of the Orange County Code, reflecting all lobbying expenditures incurred by a principal and their authorized agent(s) and the principal's lobbyist(s), contractor(s), subcontractor(s), and Contractor(s), if applicable, for certain projects or issues that will ultimately be decided by the Board of County Commissioners (BCC).

Matters specifically exempt from the SPR requirement are ministerial items, resolutions, agreements in settlement of litigation matters in which the County is a party, ordinances initiated by County staff, and some procurement items, as more fully described in 2.20 of the Administrative Regulations.

Professional fees paid by the principal to his/her lobbyist for the purpose of lobbying need not be disclosed on this form. (See Section 2-354(b), Orange County Code.)

**WHO NEEDS TO FILE THE SPR?**

The principal or his/her authorized agent needs to complete and sign the SPR and warrant that the information provided on the SPR is true and correct.

A principal that is a governmental entity does not need to file an SPR.

**HOW ARE THE KEY RELEVANT TERMS DEFINED?**

*Expenditure* means "a payment, distribution, loan, advance, reimbursement, deposit, or anything of value made by a lobbyist or principal for the purpose of lobbying. This may include public relations expenditures (including but not limited to petitions, flyers, purchase of media time, cost of print and distribution of publications) but does not include contributions or expenditures reported pursuant to Chapter 106, Florida Statutes, or federal election law, campaign-related personal services provided without compensation by individuals volunteering their time, any other contribution or expenditure made by or to a political party, or any other contribution or expenditure made by an organization that is exempt from taxation under 26 U.S.C. s. 527 or s. 501(c)(4)." (See Section 112.3215, Florida Statutes.) Professional fees paid by the principal to his/her lobbyist for the purpose of lobbying are not deemed to be "expenditures." (See Section 2-354, Orange County Code.)

*Lobbying* means seeking "to encourage the approval, disapproval, adoption, repeal, rescission, passage, defeat or modification of any ordinance, resolution, agreement, development permit, other type of permit, franchise, vendor, Contractor, contractor, recommendation, decision or other foreseeable action of the [BCC]," and "include[s] all communications, regardless of whether initiated by the lobbyist or by the person being lobbied, and regardless of whether oral, written or electronic." (See Section 2-351, Orange County Code.) Furthermore, *lobbying* means communicating "directly with the

County Mayor, with any other member of the [BCC], or with any member of a procurement committee.” (See Section 2-351, Orange County Code.) *Lobbying* also means communicating “indirectly with the County Mayor or any other member of the [BCC]” by communicating with any staff member of the Mayor or any member of the BCC, the county administrator, any deputy or assistant county administrator, the county attorney, any county department director, or any county division manager. (See Section 2-351, Orange County Code.) *Lobbying* does not include the act of appearing before a Sunshine Committee, such as the Development Review Committee or the Roadway Agreement Committee other than the BCC.

#### **DOES THE SPR NEED TO BE UPDATED IF INFORMATION CHANGES?**

Yes. It remains a continuing obligation of the principal or his/her authorized agent to update the SPR whenever any of the information provided on the initial form changes.

#### **WHERE DO THE SPR AND ANY UPDATES NEED TO BE FILED?**

The SPR needs to be filed with the County Department or County Division processing the application or matter. If and when an additional expenditure is incurred subsequent to the initial filing of the SPR, an amended SPR needs to be filed with the County Department or County Division where the original application, including the initial SPR, was filed.

#### **WHEN DO THE SPR AND ANY UPDATES NEED TO BE FILED?**

In most cases, the initial SPR needs to be filed with the other application forms. The SPR and any update must be filed with the appropriate County Department or County Division not less than seven (7) days prior to the BCC hearing date so that they may be incorporated into the BCC agenda packet. (See Section 2-354(b), Orange County Code.) When the matter is a discussion agenda item or is the subject of a public hearing, and any additional expenditure occurs less than 7 days prior to BCC meeting date or updated information is not included in the BCC agenda packet, the principal or his/her authorized agent is obligated to verbally present the updated information to the BCC when the agenda item is heard or the public hearing is held. When the matter is a consent agenda item and an update has not been made at least 7 days prior to the BCC meeting or the update is not included in the BCC agenda packet, the item will be pulled from the consent agenda to be considered at a future meeting.

#### **WHO WILL BE MADE AWARE OF THE INFORMATION DISCLOSED ON THE SPR AND ANY UPDATES?**

The information disclosed on the SPR and any updates will be a public record as defined by Chapter 119, Florida Statutes, and therefore may be inspected by any interested person. Also, the information will be made available to the Mayor and the

BCC members. This information will accompany the other information for the principal's project or item.

**CONCLUSION:**

We hope you find this FAQ useful to your understanding of the SPR. Please be informed that in the event of a conflict or inconsistency between this FAQ and the requirements of the applicable ordinance governing specific project expenditure reports, the ordinance controls.

Also, please be informed that the County Attorney's Office is not permitted to render legal advice to a principal, his/her authorized agent, or any other outside party. Accordingly, if after reading this FAQ the principal, his/her authorized agent or an outside party has any questions, he/she is encouraged to contact his/her own legal counsel.

Such termination may also result in suspension or debarment of the CONSULTANT in accordance with the County's Procurement Ordinance. The CONSULTANT and its sureties (if any) shall be liable for any damage to the COUNTY resulting from the CONSULTANT's default of the contract. This liability includes any increased costs incurred by the COUNTY in completing contract performance.

If CONSULTANT is delayed in its performance as a result of the above causes, COUNTY, shall upon written request of CONSULTANT, agree to equitably adjust the provisions of this contract, including price and delivery, as may be affected by such delay. However, this provision shall not be interpreted to limit COUNTY'S right to terminate for convenience.

**B. Termination for Convenience**

The COUNTY, by written notice, may terminate this contract, in whole or in part, when it is in the County's interest. If this contract is terminated, the COUNTY shall be liable only for goods or services delivered and accepted.

The COUNTY Notice of Termination shall provide the CONSULTANT thirty (30) days prior notice before it becomes effective. **A termination for convenience may apply to individual delivery orders, purchase orders or to the contract in its entirety.**

## Network Systems

### *Protocol Node Names and Addresses*

- ◆ The ONLY protocol allowed on the Orange County Data Network is the Internet Protocol referred to as IP or TCP/IP version 4.
- ◆ There can be only one unique address for each node on the network. Node naming and addressing conventions will conform to the guidelines established here.
  
- ◆ The NOC assigns all addresses for all devices connecting to the Orange County Network.
- ◆ All IP addresses conform to R.F.C. 1918:
  - 10.0.0.0 - 10.255.255.255/8
  
  - 172.16.0.0 - 172.31.255.255/12
  
  - 192.168.0.0 - 192.168.255.255/16
  
- ◆ The NOC maintains an addressing plan and uses the plan to assign addresses. The Internet Addressing Authority, as a private entity, has assigned a block of addresses for Orange County, which are maintained and assigned by the NOC.
- ◆ The use of Registered Internet addresses on the county network is not allowed.
- ◆ All network numbers for “special function” TCP/IP networks will be assigned by the NOC.
- ◆ No INTERNET connections are allowed from any node, modem, or communications device on the network without NOC and Enterprise Security approval.
- ◆ A network-wide, shared use INTERNET connection is available to all entities.
- ◆ TCP/IP DOMAIN NAME SERVERS (DNS) are provided for use as an alternative to local administration and maintenance of a “hosts” file. Any Divisions, Elected Officials, or agencies wishing to use the DNS may send a list of I.P. addresses to be included in the DNS to the ISS Service Center, 836-2929, which will be routed to NOC staff.
- ◆ Entities who have dedicated network staff and wish to be assigned their own I.P. address space will request the assignment from the NOC through the ISS Service Center, 836-2929. These entities will provision their own DNS and be responsible for administration of their own I.P. address spaces. (As assigned by the NOC for the agency to administer)
- ◆ Only routed networks with at least 254 I.P. nodes are eligible for this option.
- ◆ DHCP (Dynamic Host Configuration Protocol) Is provided by the NOC.
- ◆ No shared device (printer, server) may use a DHCP address.
- ◆ Static IP addresses are available in limited amounts on request.

### *Bridges, Routers, and Gateways*

- ◆ Routers will be used at points in the network where traffic control and/or broadcast domain segmentation needs exist.
- ◆ Routers will be used on all Wide Area Network connections.
- ◆ Protocol conversion is not supported on this network, as one common protocol (TCP/IP) is standard for all nodes.

- ◆ An INTERNET gateway is provided for all entities on the network to use.
- ◆ Any entity that chooses to directly connect their network to the INTERNET may not remain connected to the County Network due to the security risks. If the Internet connected entity supplies, at their own expense, an acceptable Firewall between their networks and the County networks, the County network connection can resume via the Firewall provided.
- ◆ Wireless LAN (Ethernet):
- ◆ All 802.11x wireless LANs must use a DOT1X supplicant for network admission control.

- ◆ A Remote Site is available for recovery of certain critical applications and B.C.C. networks in the event of a formally declared disaster. This site is located in Tallahassee at the Northwest Regional Data Center. (NWRDC). The NWRDC is permanently connected to the BCC networks, available and operational 24x7x365.

### ***Network Installation***

- ◆ In situations where installation of network equipment by one entity may affect other customers from other entities, the installation will be jointly coordinated by representatives of the NOC and the other entities.
- ◆ The NOC will design and install all LAN and WAN networks, except in special circumstance.

### ***Network Trouble Reporting***

- ◆ Customers who are exclusively confined to applications delivered by networks supplied by the NOC will call or e-mail the ISS Service Center, 836-2929 to report trouble, request service, and get technical advice. The ISS Service Center will screen all calls, resolve any problems it is able to with ISS Service Center staff, and refer unresolved network problems to the NOC.
- ◆ Customers who are exclusively confined to applications on networks supplied by other entities will call that entity's network staff to report trouble, request service, and get technical advice.
- ◆ Customers who are on a mix of processors and networks supplied by the NOC and other entity's processors and networks will call the ISS Service Center, 836-2929 to report trouble, request service, and get technical advice.
- ◆ The NOC employs a variety of network management and troubleshooting tools and systems. These network management systems are used by the NOC staff to perform testing, troubleshooting, and diagnosis of all devices attached to the network.
- ◆ All LAN equipment attached to the network must support SNMP (Simple Network Management Protocol) and/or SNMP-2. RMON (Remote Monitoring) is also allowed, but not instead of SNMP. RMON is in addition to SNMP. Older equipment not supporting these standards will be phased out. The NOC is the only organization permitted to run SNMP on network equipment.
- ◆ Network problems, which can be repaired by the NOC, will be scheduled in a repair queue. The repair priority is based on the severity of the problem and the quantity of customers affected.

Exhibit 1  
Orange County Florida Technology Standards  
Systems Hosted by Orange County

---

- ◆ All devices attached to the network must have at least a minimum SNMP profile entered, consisting of the entity's name, address, and technical support staff phones number. This will assist NOC staff in locating which network the equipment is on when troubleshooting.

### ***Network Performance Management***

- ◆ The NOC is responsible for monitoring all LAN and WAN performance. This includes all SNMP (Simple Network Management Protocol) and RMON (Remote Monitoring).
- ◆ Only the NOC is allowed to run SNMP/RMON on network devices.

- ◆ Any peripheral applications or software must be approved by the Telecom Unit prior to purchasing.

### ***IP Telephony***

- ◆ IP telephony is defined as telephones and PBX with an integral Ethernet NIC, using the IP protocol to communicate.
- ◆ IP phones must derive their electrical power from the CAT-5e Ethernet cable. (POE type-1, 802.af standard)
- ◆ Ethernet switches in the closets will be used to provide in-line DC power through the CAT-5e patch panels. All Ethernet electronics used in this configuration will have a UPS attached.
- ◆ If the IP phone has a provision to connect the desktop PC into the same Ethernet as the phone, then the IP phone must use Ethernet switch technology. A hub/repeater is not allowed.
- ◆ IP phones must operate in a separate subnet from the attached PC.
- ◆ IP phone packets will be given the highest priority of all IP communications traffic on the LAN. Other non-telephony applications will have their "IP Precedence" bit modified at the Ethernet switch to conform to this standard.

Exhibit 1  
Orange County Florida Technology Standards

- ◆ IP phone access to the network through the internet provider will use the ISS provided VPN services. Direct access to internal devices is prohibited.

***Video***

- ◆ Enterprise Security is responsible for ISS video service, however deployment of video equipment on the local government network must be discussed prior to purchase with the NOC to determine compatibility, bandwidth, network equipment requirements and installation feasibility.
- ◆ Multicast is generally not supported on BCC networks, except in certain special cases.

### Term

### Definition

#### FTP

File Transfer Protocol – The protocol for exchanging files over the Internet. FTP works in the same way as HTTP for transferring Web pages from a server to a user's browser and SMTP for transferring electronic mail across the Internet in that, like these technologies, FTP uses the Internet's TCP/IP protocols to enable data transfer. FTP is most commonly used to download a file from a server using the Internet or to upload a file to a server.

#### WebDav

Web-based Distributed Authoring and Versioning – Extensions to HTTP that allows users to collaboratively edit and manage files on remote Web servers.

#### Front Page Extensions

A series of scripts that can be employed using Microsoft FrontPage, a visual HTML editor.

#### SMTP

Simple Mail Transfer Protocol – A protocol for sending e-mail messages between servers. In addition, SMTP is generally used to send messages from a mail client to a mail server.

Any server found within the OCGBCC DMZ that does not meet the following criteria shall, at the discretion of the ISS-ESU, be immediately disconnected from the OCGBCC DMZ.

**18.2 Activity**

Any and all activity within and through the OCGBCC DMZ shall require direct involvement and documented approval by the ISS-ESU.

**18.3 Web Servers**

All internal ISS-ESU policies apply to the OCGBCC DMZ and are augmented by the DMZ Security Standard. The following differences are noted:

**18.3.1** Microsoft Internet Information Server (IIS) version 5 or 6 shall be the only platforms within the OCGBCC DMZ to run as a Web or FTP server.

**18.3.2** All platforms within the OCGBCC DMZ shall be patched immediately upon the release and testing by the ISS-ESU.

**18.4 Administrative Rights**

ISS-ESU shall be the only group with administrative rights to servers in the DMZ.

**18.5 Production Servers**

The OCGBCC DMZ shall host production servers only.

**18.6 Remote Access**

Remote Access to the OCGBCC DMZ shall be allowed only using Microsoft Terminal Services or Microsoft Remote Desktop protocols.

**18.7 Traffic****18.7.1 Internet Activity**

HTTP/HTTPS/FTP/SMTP/IMAPS are the only protocols allowed from the Internet into the DMZ.

**18.7.2 Internal Activity**

Traffic using the following protocols and ports from the DMZ to the internal network shall not be allowed: Kerberos, NetBIOS, Microsoft-DS, Microsoft SQL Server, Microsoft's Well Known Ports (88, 135, 137, 138, 139, 389, 445, 464, 530, 543, 544, 636, 749, 3389), LDAP, RPC, SMB, RDP, HTTP, HTTPS, DNS, JOLT.

**18.7.2.1** All traffic shall first be approved by ISS-ESU before it can be considered for inclusion in the DMZ.

**18.7.3 Routing**

**18.7.3.1** All approved access from the DMZ to the internal network shall be routed through a proxy server residing in the DMZ.

**18.7.3.2** The Enterprise DMZ proxy server shall only use firewall conduits to access approved resources within the OCGBCC network.

## Exhibit 2

### 18.8 Data

- 18.8.1** Any data accessible within the OCGBCC DMZ or directly accessible from it should be encrypted.
- 18.8.2** Any data accessible within the OCGBCC DMZ or directly accessible from it meeting the following criteria shall be encrypted at rest and in transit: name, addresses, phone numbers, email addresses, birthdates, federal/state/local document numbers, account numbers, race or religion information, usernames, passwords, employee identification numbers and all HIPAA and PCI information.
- 18.8.3** The OCGBCC DMZ shall not have access to data containing bank information.
- 18.8.4** The OCGBCC DMZ shall not have access to social security information.
- 18.8.5** The OCGBCC DMZ shall have read-only access to live data, if such data is also used by applications residing in the internal OCGBCC network.

### 19.0 Guidelines

- Should databases in policy 18.8.5 need to receive updates by the OCGBCC DMZ, the write operations should be made to a physically separate “staging” data repository. This separate data repository should contain only updates for the specific records being changed. An application server within the internal network should be used to apply the changes in the staging data repository to the live database.
- The DMZ should access data repositories in the internal OCGBCC network using SQL database calls.

### 20.0 Definitions

Term	Definition
<b>Bank Information</b>	Checking account numbers, credit card numbers, or any unique number from a bank institution.
<b>De-Militarized Zone (DMZ)</b>	A computer term used for a protected network that sits between the Internet and the corporate network.
<b>DNS</b>	Domain Name System (or Service or Server) – An Internet service that translates domain names into IP addresses. Because domain names are alphabetic, they're easier to remember. The Internet however, is really based on numeric IP addresses. Every time you use a domain name, therefore, a DNS service must translate the name into the corresponding IP address.
<b>FTP</b>	File Transfer Protocol – The protocol for exchanging files over the Internet. FTP works in the same way as HTTP for transferring web pages from a server to a user's browser and SMTP for transferring electronic mail across the Internet in that, like these technologies, FTP uses the Internet's TCP/IP protocols to enable data transfer. FTP is most commonly used to download a file from a server using the Internet or to upload a file to a server.
<b>Health Insurance Portability and Accountability Act (HIPAA)</b>	HIPAA establishes regulations for the use and disclosure of any information about health status, provision of health care, or payment for health care that can be linked to an individual.
<b>HTTP</b>	HyperText Transfer Protocol – The underlying protocol used by the World Wide Web. HTTP defines how messages are formatted and transmitted, and what actions web servers and browsers should take in response to various commands.
<b>HTTPS</b>	HyperText Transfer Protocol over Secure Socket Layer (SSL) – By convention, URLs that require an SSL connection start with https: instead of just http:.
<b>IMAPS</b>	Internet Message Access Protocol – A protocol for retrieving e-mail messages. With IMAP4, you can search through your e-mail messages for keywords while the messages are still on mail server and, then, choose which messages to download to your machine.
<b>LDAP</b>	Lightweight Directory Access Protocol – A set of protocols for accessing information directories.
<b>SSL</b>	Secure Sockets Layer – A protocol for transmitting private documents via the Internet. SSL uses a cryptographic system that uses two keys to encrypt data – a public key known to everyone and a private or secret key known only to the recipient of the message.
<b>SQL</b>	Structured query language – SQL is a standardized query language for requesting information from a database.

**ENTERPRISE SECURITY STANDARDS, POLICIES, AND GUIDELINES****ANTIVIRUS STANDARD****21.0 Purpose**

The purpose of this document is to establish requirements that must be met by all computers connected to the Orange County Government Board of County Commissioners (OCGBCC) network to ensure effective virus detection and prevention.

**22.0 Scope**

This document applies to all OCGBCC computers running any version of the Microsoft Windows Operating Systems. This includes, but is not limited to, all servers, desktop computers, laptop computers, PC-based printers and appliances.

**23.0 Policies****23.1 Virus Software – Servers**

Kaspersky Anti-Virus for Servers shall be installed and enabled on all OCGBCC computers running any server version of the Microsoft Windows Operating Systems.

**23.2 Virus Software – Workstations**

Kaspersky Anti-Virus for Workstations shall be installed and enabled on all OCGBCC computers running any non-server version of the Microsoft Windows Operating Systems.

**23.3 Virus Software – Exchange Servers**

Kaspersky Enterprise Space Security Suite for Mail Servers shall be installed and enabled on all OCGBCC computers running Microsoft Exchange Server.

**23.4 Virus Software – Internet Mail**

All incoming and outgoing internet email shall be scanned by a Barracuda Appliance in the DMZ before being delivered.

**23.5 Virus scanning**

Antivirus software shall be running at all times on the computers on which it is installed. Real-time scanning of incoming and outgoing files shall be enabled at all times. Antivirus scans of all files and folders on servers shall be executed on a weekly basis in accordance with the schedules set in the Kaspersky Administration Kit Policies for Servers. Antivirus scans of all files and folders workstations shall be executed on a weekly basis in accordance with the schedules set in the Kaspersky Administration Kit Policies for Workstations.

**24.0 Guidelines**

- When employees receive unwanted and unsolicited emails, they should be deleted and should avoid replying to the sender. These messages should not be forwarded.
- Employees should never open any files or macros attached to an email from an unknown, suspicious or untrustworthy source. These attachments should be deleted immediately. These messages should not be forwarded.
- Employees should never download files from unknown or suspicious sources.

**25.0 Enforcement**

Kaspersky's antivirus products are installed on all servers and workstations during the initial installation of the operating systems, and are continuously monitored to ensure they are running. Any employee or temporary found to have willfully stopped and/or paused these programs will be considered to be violating these policies and may be subject to disciplinary action, up to and including termination of employment.

**26.0 Definitions**

<b>Term</b>	<b>Definition</b>
<b>Virus</b>	A program or piece of code that is loaded onto your computer without your knowledge and runs against your wishes. Viruses can also replicate themselves. All computer viruses are manmade. A simple virus that can make a copy of its self over and over again is relatively easy to produce. Even such a simple virus is dangerous because it will quickly use all available memory and bring the system to a halt. An even more dangerous type of virus is one capable of transmitting itself across networks and bypassing security systems.
