Sitech/Trimble Landfill GPS System

Orange County Florida is seeking a contractor to provide the supply, installation and maintenance of a landfill GPS System for existing Caterpillar equipment to include the following:

Quantity one (1) D-5K2 Dozer
Quantity one (1) D-9K Dozer
Quantity two (2) 836k Compactors

Research within the industry has indicated to the County that this purchase is a sole source based on the following:

1. Existing Caterpillar equipment contains plug and play connections designed to only accept Caterpillar AccuGrade and the CCS900 Compaction Control System. As stated by Caterpillar, Trimble hardware/software is the only system that these plug and play features are designed and tested for.
2. Sitech North and Central Florida, LLC (NCFL) is the only company in Florida authorized to sell, install and service the Caterpillar equipment currently on-site. Sitech NCFL is also the only authorized equipment provider for the Caterpillar/Trimble systems to be installed on the D8 and 836H (non-ARO or plug and play), that are compatible with the systems to be installed on the Plug and Play 836K and D5K2.
3. Any alteration or installation of third party systems by uncertified CAT/SITECH service technicians would void the warranty.

Any vendor that wishes to view the sole source documentation to determine if they can meet the County's requirements is invited to contact Tracy Attenasio, purchasing agent by phone at 407-836-5640 or by e-mail at Tracy.Attenasio@ocfl.net. This information will be available for review until May 3, 2016 at 2:00 P.M.
