June 21, 2019 BOARD OF COUNTY COMMISSIONERS ORANGE COUNTY, FLORIDA Y19-626-RM / Addendum No. 1 REQUEST FOR INFORMATION AND PARTICIPATION IN A PRE-PROCUREMENT MARKET SOUNDING EVENT FOR PUBLIC PARTNERSHIP FOR DEVELOPING AND IMPLEMENTING A RECOVERED MATERIALS PROCESSING FACILITY IN ORANGE COUNTY, FLORIDA

THE OPENING DATE IS JULY 2, 2019

This addendum is hereby incorporated into the bid documents of the project referenced above. The following items are clarifications, corrections, additions, deletions and/or revisions to, and shall take precedence over, the original documents. <u>Underlining</u> indicates additions, deletions are indicated by strikethrough.

- A. The RFI Opening Date Remains July 2, 2019
- B. The following are questions/responses/clarifications:

Question: What is the annual volume of residential and commercial MSW generated in Orange County in each of the last 5 years?
a. Same as above as received at the transfer station
b. Same as above as received at the landfill from sources excluding the transfer station

Response: Orange County (County) Solid Waste Division (Division) does not manage all of the solid waste generated in the County. Monthly tonnage received at the Orange County Landfill (Landfill) and the McLeod and Porter Transfer Stations for the past five years and the current fiscal year is presented in Attachment 1 - Tonnage. Please note that Class 1 is MSW and Class 3 is Bulky Waste/C&D.

The Florida Department of Environmental Protection (DEP) maintains additional solid waste and recycling data on its website: <u>https://floridadep.gov/waste/waste-reduction/content/recycling</u>

Specific information on total tonnage generated in Orange County as compiled by the DEP is shown in Table 1.

County	Total	Total	Total	Total	Total
	MSW	MSW	MSW	MSW	MSW
	Managed	Managed	Managed	Managed	Managed
	2012	2013	2015	2016	2017
Orange	1,881,650	2,216,621	2,635,275	2,164,434	3,349,71 1

Table 1	DEP Reported	Tonnade for	Orange County

2. Question: Can you provide a waste characterization report for the County's MSW?

a. Does this include or exclude the recycling study provided in table 3 of the RFI?

Response: The County does not currently have a waste characterization report for its MSW. However, field work for a disposed waste composition study was recently completed in May 2019 at the Landfill as part of a statewide composition study being completed by the University of Florida for the DEP. Results of this study can be made available in the future. This work is separate from the data presented in Table 3 of the RFI.

3. Question: What is the tip fee at the landfill (include breakdown of base rate and any applicable fees levied on solid waste)?

Response: A copy of the County's current tipping fees effective October 1, 2017 is presented in Attachment 2 – Tip Fee.

4. Question: What is the tip fee at the transfer station for a) msw, and b) recyclables?

Response: See above. There is no separate published county tipping fee for recyclables.

5. Question: List the current recycling programs in Orange County including public and private programs.

Response: The County's recycling programs include: 1) the curbside residential solid waste and recycling program described in the RFI; and 2) single stream recycling collected at County-owned and operated facilities. As described in the RFI, each municipality within the County independently operates public recycling programs and commercial entities perform their own recycling activities. The County does not maintain a list of these independent activities.

6. Question: What is the fully loaded net cost per recovered ton for the County's current recycling program?

a. Include collection costs, transfer, processing, system management and administrative costs, RQIP, revenue from sales of recyclables, and any other cost or offsetting revenue. Total costs then divided by the tons of recyclables less any tons of contamination.

Response: The County pays a flat rate of \$47.50 per ton for recyclable material processing though June 30, 2019, including a host fee of \$7.50 per ton (net \$40 per ton). Beginning July 1, 2019, the County will pay a flat rate of \$49.26 (net \$41.76 per ton). The complete processing agreement can be found at:

http://apps.ocfl.net/OrangeBids/Termcontracts/listtermcontract.asp?ID=128772& CT=application/pdf&FN=Y3-1021.pdf

The County does not have the specifically requested information, the County's cost component information is offered as a substitute. The rate charged to each residential unit for the County's residential solid waste collection program (which includes garbage and recycling collection and recycling processing) for calendar year 2019 on a budget basis is presented below in Table 2. This rate estimate is currently being revised for Calendar Year 2020 and is scheduled to be presented to the Board of County Commissioners on June 18, 2019. The table below assumes 225,240 customers.

· · · · · · · · · · · · ·	
	Proposed
Component	2019
Collection	\$144.07
Disposal	\$47.12
Administration	\$15.51
Recycling/Improvement	\$5.94
Carts	\$9.19
Rate Stabilization/Reserves	\$8.17
MSBU Rate per Household	\$230.00

Table 2. Cost Component Information

7. Question: May we be allowed some additional time to prepare the RFI response based on the date we receive the information requested?

Response: The due date of responses to this Request for Information will remain unchanged.

8. Question: We are doing exactly what you've asked in your note below here in Pennsylvania with the assistance, cooperation and blessing of the Department of Environmental Protection. We also have a Municipal Recovery Facility on wheels that replaces the bricks and mortar version. This equipment 'circuit rides' to areas that have a need for recycling, but do not justify a permanent facility. I'll be in Orlando from July 10 through the 12th, if you would like a brief meeting.

Response: The County is seeking a permanent, full-time recycling facility due of the quantities of materials it manages and the larger regional requirements for a local processor of residential recyclables. However, the County welcomes a description of the 'circuit rides' and its applicability as a response to the RFI.

9. Question: Our company is the largest recycling systems integrator and plant builder in the world. We have the capabilities to produce a complete turnkey system, from concept though in house engineering and systems development, to complete installation by our personnel. We also pride ourselves in our relationships with vendors and suppliers in the industry to be able to provide a true custom and unique solution. I have set up as a "plan holder" for this project

on Orange County's website. What further steps do I need to take to ensure that we can be a part of this exciting progress in Orange County?

Response: Orange County strongly encourages interested parties to submit a response to the RFI with information requested, along with the considerations we should be seeking and including in the procurement process to meet County objectives. Further steps include participating in the Market Sounding event scheduled for July 26, 2019 in Orange County and continuing to monitor this project as it develops.

10. Question: What is the length of the term to be offered?

Response: The term of the agreement has not been decided, but the County expects that it will enter into a long-term agreement. The County welcomes recommendations and opinions from interested parties concerning the "optimal" agreement term through the RFI and market sounding process. It would be helpful if term recommendations were accompanied by explanations and justifications for desired periods required for investment for both the building and/or equipment, as well as other financial considerations.

11. Question: Will the new facility be owned by the County or the processor?

Response: It is currently envisioned that the facility will be owned by the processor. However, the County welcomes recommendations and opinions from interested parties through the RFI and Market Sounding process on other options and their beneficial impacts for the County and/or interested party. The County can make property available to site the facility and requests any additional recommendations and options be identified during the RFI process.

12. Question: Who is responsible for the cost of the building, equipment and infrastructure: the County, processor or another entity?

Response: It is currently envisioned the cost of the building, equipment, and infrastructure will be borne by the processor or party other than the County. However, the County welcomes recommendations and opinions (see previous question) from interested parties through the RFI and Market Sounding process.

13. Question: Is the facility to be designed to process the existing tonnage (62,200) or the total tonnage (62,200+92,800)

Response: The County will discuss current volumes and sizing considerations at the Market Sounding for respondent input. Subject to RFI representations and opinions and the results of the Market Sounding, the County currently plans to move forward with an RFP. It is anticipated that the RFP will outline any operating standards or expectations, taking into consideration the input from potential respondents and others who participate in the current process. The successful respondent in the planned RFP will be responsible for determining the size of facility it designs, builds, and operates based on County information provided and its own investigations.

14. Question: Is the County anticipating including the projected growth of 400,000 additional residents in the project design?

Response: The County expects the developed facility to accept and process tonnage delivered by the County and its contractors during the term of the agreement.

15. Question: Will the County consider additional processing on the site to produce end-user products in addition to the traditional processing?

Response: The County is willing to consider additional processing on the site and encourages representations of the benefits and other considerations such processing affords the County in the RFI/Market Sounding process. The County is especially interested in strengthening recycling options and local markets.

16. Question: Who is responsible for contracting the tonnage from the collectors or municipalities?

Response: The County is working with municipalities and local-government agencies within Orange County to develop partnering agreements for recycling. It is anticipated that the processor can and will enter into additional independent agreements for commercial, institutional, and other tonnage.

17. Question: Is the processor or the County responsible for the marketing of the recyclables?

Response: The processor is expected to be responsible for marketing the recyclables. However, The County welcomes recommendations and opinions from interested parties through the RFI and Market Sounding process.

18. Question: If the processor is responsible for the marketing of the recyclables, is the County responsible for the quality of recyclable feedstock being delivered?

Response: The County wishes to develop a sustainable public-private partnership which includes an agreement between the County and other parties to perform for areas of responsibility under their control. From input through the RFI/Market Sounding process, the County will build a framework around its responsibility for the quality of recyclable materials delivered by its contractors. The processor will be responsible for the quality delivered by other entities it enters into agreements with.

19. Question: If the sewers were not available at the existing MRF, how did the workers utilize bathroom and washing facilities?

Response: The existing facility has water supplied by a well and an on-site septic system for "domestic wastewater" disposal. Both systems are permitted by the Department of Environmental Protection or Health Department.

C. All other terms and conditions of the IFB remain the same.

The Bidder/Proposer shall acknowledge receipt of this addendum by completing the applicable section in the solicitation or by completion of the acknowledgement information on the addendum. Either form of acknowledgement must be completed and returned not later than the date and time for receipt of the bid or proposal.

ORANGE COUNTY SOLID WASTE DISPOSAL RATES

Approved by the Board of County Commissioners Effective October 1, 2017

The minimum charge is \$6.00

Fee Category	Description	Landfill	Porter Transfer Station	McLeod Road Transfer Station
Class I	Garbage, putrescible waste (Class I)	\$34.80/ton	\$34.80/ton	\$34.80/ton
Construction & Demolition Debris (C&D)	Clean fill, asphalt, broken concrete, wood, nonputrescible or water soluble waste, furniture, etc. (Class III)	\$26.50/ton	Only accepted at the Landfill	Only accepted at the Landfill
Yard Waste	Vegetative landscape materials including tree and shrub clippings, etc.	\$30.00/ton	\$34.80/ton accepted only on Saturdays	\$34.80/ton accepted only on Saturdays and Sundays
Asbestos (by appointment only)	Must be packed according to FDEP and Orange County specifications	\$114.00/ton	Only accepted at the Landfill	Only accepted at the Landfill
Tires	Loads of over 25 tires require a one-time variance or waste tire transporter license issued by Orange County	\$153.00/ton	\$153.00/ton	\$153.00/ton

- Yard waste materials delivered to a transfer station will be charged the Class I Solid Waste rate.
- If you fail to weigh out, your fee will be calculated to the amount of the deposit collected.
- Uncovered loads will be charged a double fee.
- Any mixed loads will be charged the higher tonnage rate.
- Bulk loads of tires accepted only at the Landfill, Monday through Friday, 8:00 a.m. to 4:00 p.m.
- Forms of payment accepted include check, cash, and all major credit cards.

For information about the Orange County Utilities Solid Waste Division, please call the **Solid Waste Hotline at 407-836-6601**.

Para más información, por favor llame al Departamento de Servicios Públicos del Condado de Orange y pida hablar con un representante en español. El número de teléfono es 407-836-6601.
