

**Orange County Sheriff's Office**  
**ITB #182-18 Law Enforcement Vehicle Equipment**  
**Addendum #1 (Issued 08/14/18)**

**Questions for ITB 182-18**

1. The HHS2200 has been discontinued and is being directly replaced with the HHS3200, is this acceptable.

Whelen now has 2 possible replacement sirens for the HHS2200. Please bid on the following replacements under section 6A Siren/Switch Control:

HHS3200-Siren Amplifier with Hand-Held Controller

295SSA2- Single tone with Hand-Held Control Head.

2. ITB #180-18 (GRAPHICS) and ITB # 181-18 (INSTALLATION), both bids require the bidder submit financial statements to OCSO for their review. However, ITB# 182-18 (EQUIPMENT), does not have the same requirement noted on the bid. Should this also have been included/required for this bid due to the dollar amount that is required for the purchase of this equipment?

Please provide only the information required in this ITB # 182-18.

3. Since OCSO is requiring that we (vendor) provide the manufacturer's standard warranty for all equipment with the bid. Will OCSO also require that we (vendor) supply letters from the manufacturer stating that we are indeed current distributors for that product and IN GOOD STANDING with that manufacturer?

Please provide only the information required in this ITB # 182-18.

4. Can you please provide the light bar configuration that OCSO is requesting for both the Whelen and Sound Off light bars?

Red drivers' side and blue passenger side with take down and alley lights.

5. Will OCSO require that we (vendor) submit SAE certification paperwork for all lighting that is submitted?

Please provide only the information required in this ITB # 182-18.
