B. Questions and Answers (Q&A)

- 1. The Bid Documents make several references to Groundwater Treatment & Disposal, but do not seem to provide any further information. The only Geotechnical information is located on two pages in the plans and they do not address contamination. Does the County/Engineer have any additional information, such as a full Geotechnical Report/Survey, which could identify the location and type (petroleum, heavy metal, etc.) of contamination that is to be encountered on this project?**

As noted in Section 7 of the IFB's Special Provisions (Part G), no known contamination exists. No additional information regarding the absence or presence of contamination is available.

- 2. In regards to the optional base groups called out for in the plans is it possible to change the soil cement to 6 inches of lime rock base / use alternative bass groups.**

No. Orange County does not accept limerock as roadway base material.
