B. The following are questions/responses/clarifications:

Question 1: We are trying to get some clarification on the specs for the Orange County FL Cell 11 Bay 17-19 Expansion project. Specifically, we are needing clarification on Tensile Strength requirement of the Geonet component. The specified values for the Geonet Tensile Strength appear to be too high, regardless of the test method used. Can you tell us how these requirements were determined, and any relevant paperwork that may be associated with these requirements? Also, to confirm, these requirements are for Geonet, not Geocomposite, correct?

Response: The strength criterium is for the geonet component of the geocomposite. See revisions to Section 33 46 23 19, Composite Drainage Net Table 33 46 23.19-1.
